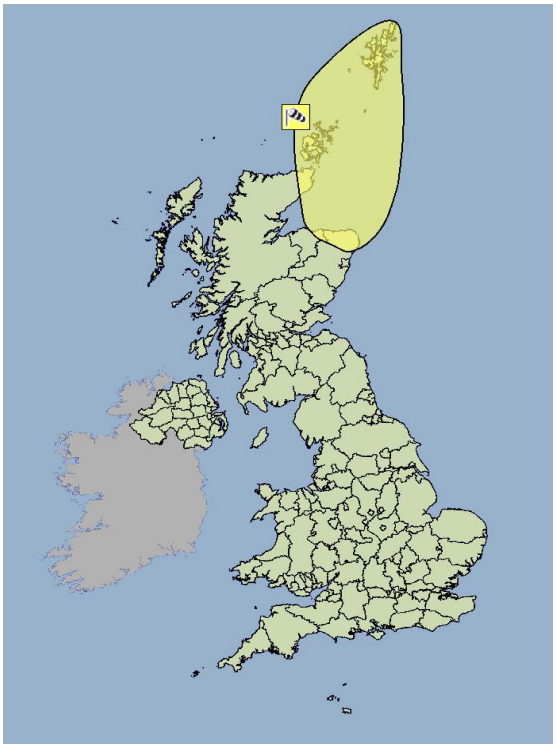
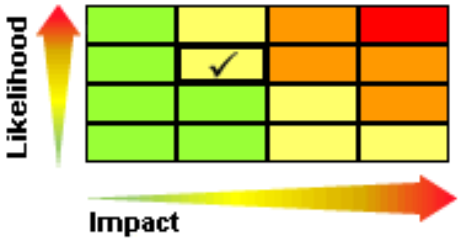
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure will continue to move northeastwards across Scotland, finally moving away from Shetland by dawn on Monday. The low pressure will generate some very strong winds to the south of the low centre. However there is still some uncertainty over the exact track and depth of this system and therefore the strongest winds.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **21:00 on Sun, 26th Feb 2017** until **06:00 on Mon, 27th Feb 2017**

The area of very strong winds will become confined to northeast Scotland overnight with a continuing reduction in wind speeds further south. There will be a short period of winds gusting 65 to 70 mph.

Some disruption to transport is possible.
